

Totalstream.net

Little League: Video streaming games to on-line viewers; and recording streams for video on demand (VOD)

Process:

At Game location: Connect the Linksys router with Sprint card to a cigarette lighter adapter, turn it on, leave it in the car. Note the IP address (Option 1) Coach or manager logs onto clients web site and schedules the event start time and duration, and Linksys IP address.

Connect 1 or more cameras wirelessly to the laptop. Wirecast software will allow the video editor to switch between cameras, edit, etc. Content will then stream to internet, and stream will be replicated by video streaming servers to the viewers. Stream will also be encoded, and downloaded to the VOD servers. Client administrator will then edit / approve VOD content for distribution.

Viewer:

To watch live content, viewer clicks on a link on the clients website. Link is auto-generated by the coach scheduling the event. To watch recorded content (VOD) there will a different link, available after a short time delay.
